

ENDA: DON'T OPEN THE DOOR TO ABORTION ON DEMAND.

Enda Kenny says that the government will decide on abortion **BEFORE** Christmas. That means he will **NOT** be consulting you.

It also means he is breaking the pro-life promise Fine Gael made in Election 2011 when they promised not to legalise abortion.

It's becoming clear that abortion campaigners exploited the tragic death of Savita Halappanavar in Galway to push for abortion.

An autopsy shows that Savita died of E-coli septicaemia.* Two medical investigations are now underway to find out how that happened.

Leading medical experts have confirmed Savita's death was NOT caused by our ban on abortion.

The truth is that Ireland's pro-life laws protect both mother and baby. Our doctors are **obliged** to save the mother's life - even if that risks the life of her baby.

If Fine Gael legislate for the X case, it will lead to abortion on demand, through all nine months of pregnancy.

It means abortion on mental health grounds, similar to Britain, where they have a liberal abortion regime.

Time is short - and the government is rushing to push abortion legislation through right now.

Fine Gael are simply ignoring the wishes of the pro-life majority. It is the Irish people - not a European Court, or a political committee - who should decide this issue.

Speak up NOW to stop Fine Gael legalising abortion. Tell them to keep their pro-life promise.
